LWVO Written Testimony on
HB176- GAS-FUEL CONVERSION PROGRAM
Alan R. Rosenfield, ScD FASM
House Ways and Means Committee
June 9, 2015

The League of Women Voters is pleased to support this legislation. We have supported similar legislation in previous sessions of the General Assembly and have been disappointed that the earlier bills were not enacted. The time has long passed for enacting legislation encouraging alternative transportation fuels.

We would prefer that all alternative fuels, particularly renewable fuels, be included in HB176. Therefore we consider this bill only as a good start. Even so, we urge quick passage.
